

Dear Western Digital Recruiters,

I am writing to apply to be a Software Engineer Intern (Web/App Development) at Digital Western. I am currently majoring in Computer Science and hope to pursue a career in Software Engineering. I am eager to learn about the variety of system design choices that are used within the company that allows the software to be accessed by millions of users. My strong communication skills, desire to work and lead teams, and analytical thinking ability will allow me to be a strong contributor to your full stack development team at Digital Western.

I am particularly drawn towards contributing changes to the codebase at Digital Western because it gives me the opportunity to enhance my skill as both a software engineer and learning proper team communication outside of academic environments. I am eager to use my prior experience with multiple software projects and team leadership to assist Digital Western in its mission to create new innovations.

My experiences with git and several popular industry software have prepared me to be a successful software intern. As a lead assist with my group project, I was responsible for configuring new projects and communicating/providing assistance to my team as needed. Through this experience, I learn ways to set up new projects and lead team members on the project, which I know will be especially valuable in my work for Software Engineering (Web Development). After working at Qin Qin Restaurant, LLC., I have developed a strong background in maintaining critical business systems and am prepared to work with people from all cultures and backgrounds. Additionally, my work as a SysAdmin/Restaurant Assistant has taught me about customer-oriented services. My experience with customer service will help me effectively maintain software that'll tailor your customers at Digital Western.

As a Sysadmin/Restaurant Assistant at Qin Qin Restaurant, LLC, I am excited about the opportunity to work as a software engineer. I am confident that I have the experience with git, database systems, and various languages used to develop full stack applications to become a successful intern. I would welcome the opportunity to discuss my qualifications with you in greater detail. Please do not hesitate to contact me by email [job@zhiyan14.com](mailto:job@zhiyan14.com) or by phone 123-456-789. Thank you for your time and consideration.

Sincerely, Zhiyan Chen
